Inline distance terminal, complete with accessories

### Product Description

The terminal is designed for use within an Inline station.

Within an Inline station, a relay terminal can be used to switch voltages that are not available in the segment in which the terminal is used (e.g., switching 230 V AC in a 24 V DC segment). In this case, place a distance terminal before and after the relay terminal. This maintains the isolating distance between the individual areas.

The distance terminals interrupt the potential jumpers for the main and segment voltage, ground, and functional ground. Cables are not connected to these terminals.

### Key Commercial Data

Packing unit	1 pc
GTIN	 4 017918 894481
GTIN	4017918894481
Weight per Piece (excluding packing)	140.000 g
Custom tariff number	85389099
Country of origin	Germany
