

TwinCAT 3 Industry specific

TF8040 | TC3 Building Automation

TC3 Building Automation is a software package that covers all technical building automation services. It contains PLC libraries for control, signal processing, special mathematical functions, alarm processing and general system functions. In addition to modules for conventional HVAC applications it also covers room automation including lighting, air-conditioning and shading.

Technical data	TF8040
Required	TC1200
Target system	Windows XP, Windows 7/8/10, Windows CE

Ordering information	
TF8040-0020	TC3 Building Automation, platform 20 (Economy)
TF8040-0030	TC3 Building Automation, platform 30 (Economy Plus)
TF8040-0040	TC3 Building Automation, platform 40 (Performance)
TF8040-0050	TC3 Building Automation, platform 50 (Performance Plus)
TF8040-0060	TC3 Building Automation, platform 60 (Mid Performance)
TF8040-0070	TC3 Building Automation, platform 70 (High Performance)
TF8040-0080	TC3 Building Automation, platform 80 (Very High Performance)
TF8040-0081	TC3 Building Automation, platform 81 (Many-core 5...8 cores)
TF8040-0082	TC3 Building Automation, platform 82 (Many-core 9...16 cores)
TF8040-0083	TC3 Building Automation, platform 83 (Many-core 17...32 cores)
TF8040-0084	TC3 Building Automation, platform 84 (Many-core 33...64 cores)
TF8040-0090	TC3 Building Automation, platform 90 (Other)
TF8040-0091	TC3 Building Automation, platform 91 (Other 5...8 cores)
TF8040-0092	TC3 Building Automation, platform 92 (Other 9...16 cores)
TF8040-0093	TC3 Building Automation, platform 93 (Other 17...32 cores)
TF8040-0094	TC3 Building Automation, platform 94 (Other 33...64 cores)
