

## KL2602-0010 | 2-channel relay output terminal 230 V AC, 5 A, make contacts, contact-protecting switching of LED lamps

The KL2602-0010 output terminal has two relays each of which has a single contact. The relay terminal is designed for soft switching at the zero voltage crossing to protect the contacts and is particularly suitable for capacitive loads such as LED lamps. The Bus Terminal indicates its signal state by means of light emitting diodes.
