

TwinCAT 3 Engineering

TE1300 | TC3 Scope View Professional

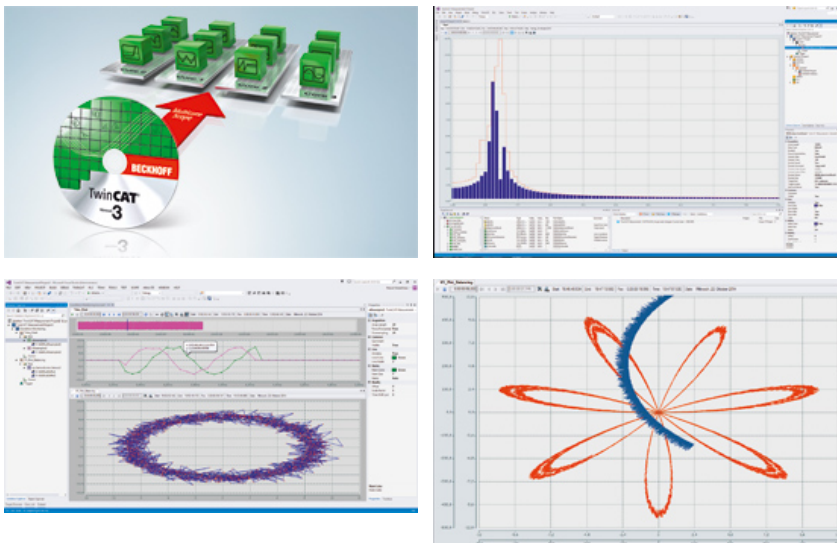

TwinCAT 3 Scope View is a software oscilloscope for the graphical display of data in a YT, XY or bar chart. Scope View Professional extends the Scope View Base version which is included in TwinCAT 3 XAE by further functionalities. It can be used for tracking and monitoring processes over a longer period of time.

Long-term recordings, print-out function, trigger-controlled data logging and report generation are part of the functionality. Furthermore, Scope View Professional can be integrated into a user's .NET-based visualisation. Thus, seamless integration into an existing machine visualisation is possible.

Like TwinCAT 3 XAE, Scope View integrates itself into Microsoft Visual Studio®. It can be used as a stand-alone project or in combination with a TwinCAT project within a solution. The cross-project work is simplified by the docking-window functionality. Variables can be delivered from the System Manager or directly out of the PLC into the Scope configuration.
