

TF6360 | TC3 Virtual Serial COM

TwinCAT Virtual Serial COM allows the EL60xx EtherCAT Terminals or EP6002 EtherCAT Box modules to be integrated into Windows XP, Windows 7/8/10 or Windows CE as normal serial interfaces. The computer on which a serial interface is to be generated for it is defined individually for each EL60xx/EP6002. Access to the device connected to the terminal takes place via Windows API for serial interfaces.

Technical data	TF6360
Required	TC1100
Target system	Windows XP, Windows 7/8/10, Windows CE

Ordering information	
TF6360-0030	TC3 Virtual Serial COM, platform 30 (Economy Plus)
TF6360-0040	TC3 Virtual Serial COM, platform 40 (Performance)
TF6360-0050	TC3 Virtual Serial COM, platform 50 (Performance Plus)
TF6360-0060	TC3 Virtual Serial COM, platform 60 (Mid Performance)
TF6360-0070	TC3 Virtual Serial COM, platform 70 (High Performance)
TF6360-0080	TC3 Virtual Serial COM, platform 80 (Very High Performance)
TF6360-0081	TC3 Virtual Serial COM, platform 81 (Many-core 5...8 cores)
TF6360-0082	TC3 Virtual Serial COM, platform 82 (Many-core 9...16 cores)
TF6360-0083	TC3 Virtual Serial COM, platform 83 (Many-core 17...32 cores)
TF6360-0084	TC3 Virtual Serial COM, platform 84 (Many-core 33...64 cores)
TF6360-0090	TC3 Virtual Serial COM, platform 90 (Other)
TF6360-0091	TC3 Virtual Serial COM, platform 91 (Other 5...8 cores)
TF6360-0092	TC3 Virtual Serial COM, platform 92 (Other 9...16 cores)
TF6360-0093	TC3 Virtual Serial COM, platform 93 (Other 17...32 cores)
TF6360-0094	TC3 Virtual Serial COM, platform 94 (Other 33...64 cores)
