

Model Number

Montageplatte FLT

Mounting plate for FLT-8 series sensors

Features

- Mounting plate for the installation of FLT-8 series sensors in suspended ceilings
- Front panel specially toughened and crack resistant
- Carrying frame for sensor with adjustable 4-point fixture
- Precise sensor orientation using additional adjustment screws

Dimensions

Technical data

Mechanical specifications

Material	Plastic ABS
Optical face	Clear Plexiglas
Mass	approx. 155 g

Suitable series

Series	FLT-8
--------	-------

Used to install sensors in suspended ceilings. The sensor can be rotated after it is installed by two screws accessible from the front. This makes it possible to adjust the recording range accurately. After the setting has been made, the adjustment screws can be hidden behind the accompanying cover flap.
