NI40R-**

- Rectangular, height 32 mm
- Plastic, ABS
- Modular design, mountable with S32SR-AP44X-S1131 or S32SR-VP44X switching amplifier

**Functional principle**

Inductive sensors detect metal objects contactless and wear-free. For this purpose they use a high-frequency electromagnetic AC field that interacts with the target. Inductive ring sensors generate this field through an LC resonant circuit. The target acts as the coil core.
